

# The Ultimate Package

## The last website you will ever need

When you purchase a Webarena website, you've made an investment in your future. As your business grows over time, you won't have to pay for a entire new website every time your requirements change. With Webarena, you buy one website and that's it - your site can grow as you grow to ensure that your site keeps pace with your business and technology.

## Completely scalable

The Webarena core system and all our additional modules are created by us for our customers. You can extend the functionality of your site immediately without having to build a whole new website.

## Free upgrades

The internet is continually growing at an amazing rate and the technology changes just as rapidly. Your Webarena website is always up to date and this ensures you are using it to it's full potential. We regularly upgrade and improve our core system with new features, options and enhancements.

## Webarena Content Management System (CMS)

A website without a Content Management System (CMS) is not taking advantage of the full potential of the internet. CMS's are the latest in internet technology and they allow you to edit and update your own website simply by logging in to our online editing program. All Webarena websites come with a powerful but simple to use CMS, so you can save time and money and retain control over your own website content. You don't have to wait or pay for us to make changes for you.

## Web Design

Every Webarena website is custom designed. We offer a range of over 500 designs for inspiration to our customers to get the creative juices flowing. We find that this stimulates the creative process and allows our customers to relate their vision to our designers in a more satisfactory way. You are in complete control and only sign off on your site design when you are entirely satisfied. No two Webarena websites are the same.

## Quadruple the features, half the cost

Get the same functional features as used by large companies, at a price that's affordable for your business.
